

Q1- Read the passage, then answer only Five of the following questions:

We all know that water is the main source of life. Without water, life on Earth would be impossible; man, animals and plant would die. Water is necessary for planting and industry. Man can get water from rains, rivers, wells and sometimes from seas and lakes after removing salt from their water. People use fresh water in drinking, washing, watering plants and other daily things. Therefore dams are built to store water behind them to use it time of need. We also get fish which is one of the most important and useful kinds of food from the water of the rivers, the seas and the lakes. We should make good use of water.

The questions:

1. What is the main source of life?
2. Is it possible to life without water?
3. What are the uses of fresh water?
4. Where can we get water?
5. Why are dams built?
6. What would happen to life on Earth without water?
